**DETAILED ACTION**

1. The applicants amended claims 32-36, 38-40, 42-43, 45-51, 54-56, 59-67, 69-72, 74, 76-82, 84-86, 88-89, and 91-94 in the amendment received on 8/18/05.

The pending claims are 32-94.

***Allowable Subject Matter***

2. Claims 32-94 are allowed.

***Reason For Indicating Allowable Subject Matter***

Claims 32 and 78 identify the distinct features, "determining multiple phonetic representations for a portion of the text input name, each of the multiple phonetic representations being for a different pronunciation of the text input name and comparing each of the multiple phonetic representations of the portion of the text input name to a phonetic representation of a portion of a text known name stored in a database", which are not taught or suggested by the prior art made of records. The closest prior art, Oshika et al. ("Improved Retrieval Of Foreign Names From Large Database", 1988, IEEE, pages 480-487) disclosing searching and matching a proper name of an input name by generating spelling variations of the input name, wherein the spelling variations is for the same pronunciation of the input name, fails to suggest the claimed limitations as mentioned above in combination with other claimed elements. The above features in conjunction with all other limitations of the dependent and independent claims 32-94 are hereby allowed.
